

FEBRUARY 2025 SPOTLIGHT

THIS MONTH AT VISION ILLUMINATION

INVESTING IN KNOWLEDGE

Education is key to staying at the forefront of the industry, which is why members of the Vision Illumination team attended Module A of the Exterior Lighting Diploma course, run by the Institution of Lighting Professionals (ILP) in Rugby. This module covered the fundamentals of light, human vision, photometry, lighting standards, and legislation—all essential for designing high-quality lighting solutions. A big thanks to the tutors and fellow attendees for such an insightful week! We're looking forward to Module B in March and Module C in April.

LIGHTS, CAMERA, ACTION!

This month, we took an exciting step forward in showcasing Vision Illumination and our partnership with SNAPFAST. The Deli Film Co joined us to capture behind-the-scenes footage, highlighting our innovative lighting solutions, cutting-edge battery technology, and commitment to sustainability. We can't wait to share the final videos with you—stay tuned for an inside look at what makes Vision Illumination unique!

COMING SOON: THE ASTOR HERITAGE LANTERN

Following the success of our Kipling lantern, we're excited to introduce a new heritage lighting option—Astor. Featuring an all-black finish, this sleek variation maintains the timeless elegance of its predecessor while offering an alternative aesthetic that may be better suited for certain environments. Stay tuned for more details, and reach out if you'd like to learn more!

SITE VISIT: MAIDEN LAW, COUNTY DURHAM

We recently visited Maiden Law to see our Nano Solar Twin Sign Lights in action! Durham County Council needed an off-grid lighting solution for a double sign, including a national speed limit sign and a Welcome to Maiden Law 30mph sign. Our Titanvolt-powered Solar Nano units delivered reliable, sustainable illumination—proving once again how our technology can provide visibility without reliance on the grid. Always great to see our solutions performing in real-world applications!

Vision Illumination News

STAY UPDATED WITH OUR NEW WEBSITE NEWS SECTION

We've launched a dedicated News section on our website! This will be the go-to place for our latest updates on projects, product innovations, industry insights, and company milestones. We're constantly pushing the boundaries of on-grid and off-grid lighting solutions, and now you can stay informed every step of the way. Check it out on our website!
