

NOVEMBER 2024 SPOTLIGHT

THIS MONTH AT VISION ILLUMINATION

VISION ILLUMINATION'S NEW WEBSITE LAUNCHED

We're excited to announce the launch of our newly redesigned website! The updated site showcases our full range of lighting solutions, including both on-grid and off-grid products, along with detailed case studies, product specifications, and an easier-to-navigate user experience. It's been designed with our clients and partners in mind, providing them with valuable insights and resources to help with their lighting needs. Visit us today to explore the enhanced features and updated content!

JOINING THE NORTH EAST CHAMBER OF COMMERCE

We are pleased to share that Vision Illumination has become a member of the North East Chamber of Commerce. This membership provides us with opportunities to network, collaborate, and grow within the local business community. As a forward-thinking company, we're committed to strengthening our presence and continuing to support local initiatives, and we look forward to building new connections and sharing our expertise with fellow businesses in the region.

UNDERPASS RETROFIT PROJECT IN PARTNERSHIP WITH ENERVEO

This month, we completed a successful underpass retrofit project in partnership with Enerveo. The project involved the installation of our energy-efficient lighting solutions to replace outdated systems in key urban locations. The result is improved lighting quality, reduced energy consumption, and enhanced safety for pedestrians. This collaboration underscores our dedication to providing innovative, sustainable lighting solutions for infrastructure projects, and we're proud of the impact this retrofit has had on the community.

PRODUCT DEVELOPMENT

We're continually innovating to provide cutting-edge solutions, and several exciting projects are currently in development at Vision Illumination:

- **New Bollard Design:** We're working on a new bollard design that will enhance both the aesthetic and functionality of our outdoor lighting options. Stay tuned for more details as we finalize this innovative product.
- **Belisha Beacon:** Our Belisha Beacon is designed to offer high-performance, off-grid lighting for remote locations. We're in the final stages of development, ensuring it meets the highest standards of durability and energy efficiency.
- **Ground Screw Application for Off-Grid Lanterns:** We're expanding our off-grid lantern solutions with a new ground screw application. This will allow for easier installation and mobility, providing a more flexible option for temporary and permanent lighting installations in various environments.

JOINT VENTURE ANNOUNCEMENT

We're excited to share that Snapfast, our trusted distribution partner, has formed a joint venture with TITANVOLT, a leader in advanced battery technology.

At Vision Illumination, we're proud to already integrate TITANVOLT batteries into our off-grid lighting solutions. These cutting-edge batteries, known for their durability and performance in extreme conditions, enhance the reliability and sustainability of our solar-powered lanterns.

This collaboration strengthens our shared vision of delivering innovative, eco-friendly lighting solutions to meet the demands of any environment.
